

*Based on a sweeping, ten country study, The Work-Family Interface in Global Context* comprises the most comprehensive and rigorous cross-cultural study of the work-family interface to date. Just as work-family conflict is associated with negative consequences for workers, organizations, and societies, so too can the work and family domains interact positively to enhance or enrich one another. Drawing on qualitative, quantitative, and policy-based data, chapters in this collection explore the influence of culture on the work-family interface in order to help researchers and managers understand the applicability of work-family models in a variety of contexts and further conceptualize work-family interactions through the development of a more universal knowledge. Members of the Project 3535 Team: Karen Korabik, University of Guelph, Canada. Zeynep Aycan, Koç University, Turkey. Raya Ayman, Illinois Institute of Technology, USA. Artiwati, University of Surabaya, Indonesia. Anne Bardeel, Monash University, Australia. Anat Drach-Zahavy, University of Haifa, Israel. Leslie B. Hammer, Portland State University, USA. Ting-Pang Huang, Soochow University, Taiwan. Donna S. Lero, University of Guelph, Canada. Tripti Pande-Desai, New Delhi Institute of Management, India. Steven Poelmans, EADA Business School, Spain. Ujvala Rajadhyaksha, Governors State University, USA. Anit Somech, University of Haifa, Israel. Li Zhang, Harbin Institute of Technology, China. Distinguished authors detail cross-cultural issues affecting youngsters, including parenting practices, gender role socialization, risk and resilience in childhood, and more. The text challenges existing beliefs about childhood development, offers current research on childrearing and socialization practices in diverse cultures, and examines social and educational policies as they relate to children and adolescents. Socialization practices within families, communities, and educational settings are included. This volume, which includes both field-based and experimental research, will appeal to practitioners, scholars, and students in the fields of child psychology, cross-cultural psychology, anthropology, sociology, child and family studies, and social work.

This is the first of a two-volume set that constitutes the refereed proceedings of the Second International Conference on Usability and Internationalization, UIHCII 2007, held in Beijing, China in July 2007. The papers of this first volume cover HCI and culture and are organized in topical sections on cross-cultural design, internationalization and intercultural usability, as well as user studies.

Sponsored by the National Council on Family Relations, the Sourcebook of Family Theory and Research is the reference work on theory and methods for family scholars and students around the world. This volume provides a diverse, eclectic, and paradoxically mature approach to theorizing and demonstrates how the development of theory is crucial to the future of family research. The Sourcebook reflects an interactive approach that focuses on the process of theory building and designing research, thereby engaging readers in "doing" theory rather than simply reading about it. An accompanying Web site, <http://www.ncfr.org/sourcebook>, offers additional participation and interaction in the process of doing theory and making science.
