the first 56 Joseph Fisher Lectures in economics and commerce, presented at the Adelaide University every other year since 1904. Funds for the Lectures, together with a medal for the top accounting student each year, were kindly provided by a £1,000 endowment to the University by the prominent Adelaide businessman Joseph Fisher in 1903. The Lectures address a wide range of Australian economic issues, in addition to some international economic issues of national significance. They have stood the test of time extremely well,

The law of treaties and the study of treaty-making procedures in municipal law systems have become both from a theoretical and practical point of view, subjects of increasing interest. The United Nations Legal Committee as well as the International Law Commission have published studies concerned with the

relationship of international law and municipal law, emphasizing national practices concerning the conclusion of treaties. In the case of some countries, such as Great Britain and the United States, numerous studies of treaty making problems have been made, but much less has been published in the case of many other countries such as Australia, Canada or India. In the case of Australia, research on treaty-making has resulted in comparatively few published articles in scholarly and legal journals and only a

few comments in general legal treatises. But no comprehensive legal analysis of the subject has as yet appeared. This study aims to present a comprehensive survey and analysis of actual treaty making procedures and practices in Australia against the setting of the relevant constitutional and other legal norms of the Australian political system. The analysis of treaty-making will consider both normative and empirical legal aspects. Basic constitutional norms, legal principles derived from common and

From the author of the New York Times bestseller *Prisoners of Geography*, the highly anticipated follow-up that uses ten maps of crucial regions around the globe to explain the geopolitical strategies of today's world powers and what it means for our future. Tim Marshall's global bestseller *Prisoners of Geography* offered us a "fresh way of looking at maps" (*The New York Times Book Review*), showing how every nation's

choices are limited by mountains, rivers, seas and concrete. Since then, the geography hasn't changed, but the world has. Now, in this revelatory new book, Marshall takes us into ten regions that are set to shape global politics and power. Find out why the Earth's atmosphere is the world's next battleground; why the fight for the Pacific is just beginning; and why Europe's next refugee crisis is closer than we think. In ten chapters covering Australia, The Sahel, Greece, Turkey, the UK, Iran, Ethiopia, Saudi Arabia, Spain and Space, Marshall explains how a region's geography and physical characteristics affect the decisions made by its leaders. Innovative, compelling, and delivered with

This book is about the power of education: the kind of education that simultaneously improves the quality of life both of individuals and the wider society. It explains why education must be viewed as a basic human right, as a value in and of itself, and reviews the evidence on how education builds the human resources that individuals and nations need to be productive, to

continue to learn, to solve problems, to be creative, and to live together and with nature in peace and harmony. When nations ensure that such an education is accessible to all throughout their lives, education becomes the engine of sustainable development - economic, social, moral and cultural. The book is unique in that it covers the development of education at all levels in all countries of the Asia-Pacific region and beyond, using the latest international data bases, while blending in analyses of both quantitate and qualitative research.

This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the

Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty

years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

Economics, Keynes once wrote, can be a 'very dangerous science'. Sometimes, though, it can be moulded to further the common good though it might need a leap in mental outlook, a whole new zeitgeist to be able do do. This book is about a transformation in

Australian economists' thought and ideas during the interwar period. It focuses upon the interplay between economic ideas, players and policy sometimes in the public arena. In a decade marked by depression, recovery and international political turbulence Australian economists moved from a classical orthodox economic position to that of a cautious Keynesianism by 1939. We look at how a small collective of economists tried to influence policy-making in the nineteen-thirties. Economists felt obliged to seek changes to the parameters as economic conditions altered but, more importantly, as their insights about economic management changed. There are three

Acces PDF The Power Of One Australian Childrens Classics

related themes that underscore this book. Firstly, the professionalisation of Australian economics took a gigantic leap in this period, aided in part, by the adverse circumstances confronting the economy but also by the aspirations economists held for their discipline. A second theme relates to the rather unflattering reputation foisted upon interwar economists after 1945. That transition underlies a third theme of this book, namely, how Australian economists were emboldened by Keynes's General Theory to confidently push for greater management of economic activity. By 1939 Australian economists conceptualized from a new theoretic framework and from one which

Acces PDF The Power Of One Australian Childrens Classics

they advanced comment and policy advice. This book therefore will rehabilitate the works of Australian interwar economists, arguing that they not only had an enviable international reputation but also facilitated the acceptance of Keynes's General Theory among policymakers before most of their counterparts elsewhere.

Gerald Murnane is tachtig, schreef zo'n vijftien boeken, The New York Times noemde hem 'de grootste auteur in het Engelse taalgebied' en hij lijkt een gedoodverfde Nobelprijswinnaar. Toch hebben veel mensen nog nooit van de Australiër gehoord. Misschien komt dat doordat Murnane in het gehucht Goroke woont, omringd door stapels archieven van zijn eigen schrijfsels. Hij heeft nog nooit in een vliegtuig gezeten, heeft geen tv en geen computer: hij schrijft met één vinger op zijn typemachine. Als hij niet schrijft, staat hij achter de bar

From a review in the Australian Law Journal: "This book is a delightful surprise, for within its bare title the authors have covered the law concerning powers of attorney on both sides of the Tasman. The text is written in a clear and lucid fashion. It is well laid out, and provides in convenient form the texts of the relevant legislation applying throughout Australia and in New Zealand. It provides an accurate summary of the law as applying at the end of 1992. The index is unusually comprehensive, and the coverage of this area of law is thoroughly professional. It should prove to be a most

Contemporary Politics in Australia

Covers all the fundamental areas of financial planning with practical examples and case studies.

Constitutional law provides the legal framework for the Australian political and legal systems, and thus touches almost every aspect of Australian life. The Handbook offers a critical analysis of some of the most significant

aspects of Australian constitutional arrangements, setting them against the historical, legal, political, and social contexts in which Australia's constitutional system has developed. It takes care to highlight the distinctive features of the Australian constitutional system by placing the Australian system, where possible, in global perspective. The chapters of the Handbook are arranged in seven thematically-grouped parts. The first, 'Foundations', deals with aspects of Australian history which have influenced constitutional arrangements. The second, 'Constitutional Domain', addresses the interaction between the constitution and other relevant legal systems and orders, including the common law, international law, and state

constitutions. The third, 'Themes', identifies themes of special constitutional significance, including the legitimacy of the constitution, citizenship, and republicanism. The fourth, 'Practice and Process', deals with practical issues relevant to constitutional litigation, including the processes, techniques, and authority of the High Court of Australia. The final three parts deal with the structural building blocks of the Australian Constitutional system: 'Separation of Powers', 'Federalism', and the 'Protection of Rights.' Written by a team of experts drawn from academia and practice, the Handbook provides Australian and international readers alike with a reliable source of knowledge, understanding, and insight into the Australian

system of governance. This book evaluates the role and performance of this centrepiece of Australian government. It explores the institutional design of the parliament, and its principles and practices, presenting a compelling case for reform. Uhr discusses parliament's representative and legislative roles, and the issue of accountability. He looks at the place of representative assemblies in liberal political theory and assesses current institutional performance. He argues that republicanism can be seen as a form of deliberative democracy, examining ways in which such democracy might be made more effective and meaningful in Australia. Combining an authoritative knowledge of political theory with a familiarity with the inner-workings
